SATEVA has developed everything from exploration drill hole systems to grade control, geo-metallurgical, ore tracking, reconciliation, rail systems, and block model management solutions.

Some of our current and past projects include:

Domain	Project
Project Management	Integrated Drilling Programme Management System Contractor Health & Safety System
Evaluation	Denormalised AcQuire Database
Estimation	Block Model Statistics/Charting System
Metallurgy	Regressions Management System Geo-Metallurgical System
Drill & Blast	Misfire Analysis System
Mine Geology	Mine Geology Systems Design Mine Geology Portal Mobile Data Logger
Laboratories	Laboratory Information Management System Design
Logistics	Vehicle and Equipment Tracking System (Google Earth) Consolidated Vehicle Tracking Database Lighting Towers Tracking System
HR Management	Professional Development System
Planning	Integrated Planning Database
Production	In-Pit Stockpiles Management System
Rail	Rail Obstruction Scheduling System Rolling Stock GPS System Network Planning and Scheduling System Rolling Stock Maintenance System
Ore Tracking & Reconciliation	Quarterly Reconciliations Database In-Pits Stockpile Management System Prototype
Strategic Planning	Block Model Automation Prototype Strategic Planning System

Staff

SATEVA currently has a staff of 23 people made up of 7 consultants, 14 developers, DBAs, and test analysts, and 2 administration staff member. SATEVA's developers and DBA's have expertise in Microsoft.Net, ASP.Net, C#.Net, VB.Net, T-SQL, and PL/SQL programming languages, and Oracle, SQL Server, and Microsoft Analysis Services database technologies. Our business analysts and project managers have years of industry and project experience. SATEVA's project managers can assist in running package implementation or software development projects. If the project requires a technical IT solution to be built then SATEVA can build the solution using our application delivery team.

Management

Mark Forster is the founder and managing director of SATEVA. Mark has significant experience in the design, construction, and implementation of mining and rail systems for organisations which include Rio Tinto Iron Ore, BHP Billiton Iron Ore, BMA Coal, Rio Tinto Exploration, Hamersley Iron, Datamine, and Snowden. Prior to founding SATEVA, Mark worked at Datamine, Snowden, and was the Regional Sales Manager for Mercury Interactive in Cape Town, South Africa. In addition, Mark has held sales management, sales, and technical positions at several large US software companies including Computer Associates, Platinum Technology, and Oracle Corporation.
